## 1. AMIC KNEE Overall

### 1.1. RCT

1. Volz, et al., (2024) A randomized controlled trial demonstrating sustained benefit of autologous matrix-induced chondrogenesis (AMIC®) over microfracture: 10-year follow-up. *Eur J Orthop Surg Traumatol.* 2024 Apr 17. <https://pubmed.ncbi.nlm.nih.gov/38630297/>
2. Snow M, *et al.* (2023) A Randomized Trial of Autologous Chondrocyte Implantation Versus Alternative Forms of Surgical Cartilage Management in Patients With a Failed Primary Treatment for Chondral or Osteochondral Defects in the Knee. *Am J Sports Med.*51(2):367-78. <https://www.ncbi.nlm.nih.gov/pubmed/36661257>
3. de Girolamo L, et al. (2019) Autologous Matrix-Induced Chondrogenesis (AMIC) and AMIC Enhanced by Autologous Concentrated Bone Marrow Aspirate (BMAC) Allow for Stable Clinical and Functional Improvements at up to 9 Years Follow-Up: Results from a Randomized Controlled Study. *J Clin Med.*8(3). <https://www.ncbi.nlm.nih.gov/pubmed/30901900>
4. Fossum V, et al. (2019) Collagen-Covered Autologous Chondrocyte Implantation Versus Autologous Matrix-Induced Chondrogenesis: A Randomized Trial Comparing 2 Methods for Repair of Cartilage Defects of the Knee. *Orthopaedic Journal of Sports Medicine.*7(9):2325967119868212. <https://pubmed.ncbi.nlm.nih.gov/23730377/>
5. Volz M, et al. (2017) A randomized controlled trial demonstrating sustained benefit of Autologous Matrix-Induced Chondrogenesis over microfracture at five years. *Int Orthop.*41(4):797-804. <https://www.ncbi.nlm.nih.gov/pubmed/28108777>
6. Anders S, et al. (2013) A Randomized, Controlled Trial Comparing Autologous Matrix-Induced Chondrogenesis (AMIC(R)) to Microfracture: Analysis of 1- and 2-Year Follow-Up Data of 2 Centers. *Open Orthop J.*7:133-43. <https://www.ncbi.nlm.nih.gov/pubmed/23730377>

### 1.2. Meta-analysis

7. Tan C, et al. (2024) Arthroscopic and open approach for autologous matrix induced chondrogenesis (AMIC®) repair of the knee have similar results: a meta-analysis. *J ISAKOS.* 2023; <https://doi.org/10.1016/j.jisako.2023.10.003>
8. Migliorini F, et al. (2021) Surgical management of focal chondral defects of the knee: a Bayesian network meta-analysis. *J Orthop Surg Res.*16(1):543. <https://www.ncbi.nlm.nih.gov/pubmed/34470628>
9. Migliorini F, et al. (2022) Autologous matrix-induced chondrogenesis is effective for focal chondral defects of the knee. *Sci Rep.*12(1):9328. <https://www.ncbi.nlm.nih.gov/pubmed/35661147>
10. Steinwachs MR, et al. (2019) Systematic Review and Meta-Analysis of the Clinical Evidence on the Use of Autologous Matrix-Induced Chondrogenesis in the Knee. *Cartilage.*1947603519870846. <https://www.ncbi.nlm.nih.gov/pubmed/31508990>

### 1.3. Systematic Review

11. Ong, et al., (2024) A systematic review on Autologous Matrix Induced Chondrogenesis (AMIC) for chondral knee defects. *Knee* 51:102–113. <https://doi.org/10.1016/j.knee.2024.08.003>
12. Migliorini F, et al. (2022) Matrix-induced autologous chondrocyte implantation (mACI) versus autologous matrix-induced chondrogenesis (AMIC) for chondral defects of the knee: a systematic review. *British Medical Bulletin.*Idac004. <https://doi.org/10.1093/bmb/ldac004>
13. Karpinski K, et al. (2021) Matrix-induced chondrogenesis is a valid and safe cartilage repair option for small- to medium-sized cartilage defects of the knee: a systematic review. *Knee Surg Sports Traumatol Arthrosc.* <https://www.ncbi.nlm.nih.gov/pubmed/33743030>

14. da Cunha CB, et al. (2020) Enhanced microfracture using acellular scaffolds improves results after treatment of symptomatic focal grade III/IV knee cartilage lesions but current clinical evidence does not allow unequivocal recommendation. *Knee Surg Sports Traumatol Arthrosc.* <https://www.ncbi.nlm.nih.gov/pubmed/31894366>
15. Kim J, et al. (2020) Clinical and Radiological Outcomes After Autologous Matrix-Induced Chondrogenesis Versus Microfracture of the Knee: A Systematic Review and Meta-analysis With a Minimum 2-Year Follow-up. *Orthopaedic Journal of Sports Medicine.*8(11):2325967120959280. <https://pubmed.ncbi.nlm.nih.gov/33209942/>
16. Gao L, et al. (2019) Autologous matrix-induced chondrogenesis: a systematic review of the clinical evidence. *The American journal of sports medicine.*47(1):222-31. <https://pubmed.ncbi.nlm.nih.gov/29161138/>
17. Shaikh N, et al. (2017) Systematic review on the use of autologous matrix-induced chondrogenesis for the repair of articular cartilage defects in patients. *World J Orthop.*8(7):588-601. <https://www.ncbi.nlm.nih.gov/pubmed/28808630>
18. Wylie JD, et al. (2016) Failures and Reoperations after Matrix-Assisted Cartilage Repair of the Knee: A Systematic Review. *Arthroscopy - Journal of Arthroscopic and Related Surgery.*32(2):386-92. <https://www.ncbi.nlm.nih.gov/pubmed/26422710>
19. Bark S, et al. (2014) Enhanced microfracture techniques in cartilage knee surgery: Fact or fiction? *World J Orthop.*5(4):444-9. <https://www.ncbi.nlm.nih.gov/pubmed/25232520>
20. Lee YHD, et al. (2014) Autologous Matrix-Induced Chondrogenesis in the Knee: A Review. *Cartilage.*5(3):145-53. <https://www.ncbi.nlm.nih.gov/pubmed/26069694>

#### 1.4. Case Control

21. Behrendt, et al., (2024) Autologous matrix-induced chondrogenesis provides better outcomes in comparison to autologous minced cartilage implantation in the repair of knee chondral defects. *Knee Surg, Sports Traumatol, Arthrosc.* 2024 Jul 30. <https://pubmed.ncbi.nlm.nih.gov/39077845/>
22. Debieux, et al., (2024) Autologous Matrix-Induced Chondrogenesis Versus Osteochondral Autograft Transfer System in Patellar Chondral Lesions: A Comparative Study with a 2-Year Follow-Up. *Journal of Cartilage & Joint Preservation.* 26 April 2024, 100189. <https://doi.org/10.1016/j.jcip.2024.100189>
23. Migliorini F, *et al.*, (2021) Management of Patellar Chondral Defects with Autologous Matrix Induced Chondrogenesis (AMIC) Compared to Microfractures: A Four Years Follow-Up Clinical Trial. *Life (Basel).* 11(2). <https://pubmed.ncbi.nlm.nih.gov/33668454/>
24. Migliorini F, *et al.*, (2021) Autologous Matrix-Induced Chondrogenesis (AMIC) and Microfractures for Focal Chondral Defects of the Knee: A Medium-Term Comparative Study. *Life (Basel).* 11(3). <https://pubmed.ncbi.nlm.nih.gov/33669015/>
25. Schagemann J, *et al.* (2018) Mid-term outcome of arthroscopic AMIC for the treatment of articular cartilage defects in the knee joint is equivalent to mini-open procedures. *Arch Orthop Trauma Surg.* 138(6):819-25. <https://www.ncbi.nlm.nih.gov/pubmed/29356942>

#### 1.5. Case series

26. Gille, *et al.*, (2024) Patient-Reported Outcome Measures in the Repair of Chondral Defects: How Well Do the Scores Relate to Each Other? *Surg Technol Int* 45: <https://pubmed.ncbi.nlm.nih.gov/39374580/>
27. Uso *et al.*, (2024) Drop in survivorship 13 years after AMIC procedures in aligned knees: A long-term follow-up. *Knee Surg, Sports Traumatol, Arthrosc.* <https://pubmed.ncbi.nlm.nih.gov/38984906/>

28. Sciaretta, *et al.*, (2024) One-stage cartilage repair using the autologous matrix-induced chondrogenesis combined with simultaneous use of autologous adipose tissue graft and adipose tissue mesenchymal cells technique: clinical results and magnetic resonance imaging evaluation at five-year follow-up. *Int Orthop.* 2024 Jan;48(1):267-277  
<https://pubmed.ncbi.nlm.nih.gov/37656198/>
29. Peras M, et al. (2023) Does AMIC® Provide Improvements at Least Two Years After Surgery for Knee Osteochondral Lesions? A Multicentre Retrospective Study of 101 Patients. *Orthop Traumatol: Surg Res.* 2023;103774. <https://pubmed.ncbi.nlm.nih.gov/38008249/>
30. Gille J, et al. (2023) Positive outcomes following Autologous Matrix-Induced Chondrogenesis (AMIC) in the treatment of retropatellar chondral lesions: a retrospective analysis of a patient registry. *BMC Musculoskelet Disord.* 2023;24(1):964. <https://pubmed.ncbi.nlm.nih.gov/38082264/>
31. Mitrousias V, et al. (2023) Satisfactory patient-reported outcomes in patients treated with impaction bone grafting and autologous matrix-induced chondrogenesis for osteochondral knee defects. *Knee Surg Sports Traumatol Arthrosc.* 2023; <https://doi.org/10.1007/s00167-023-07626-2>
32. Allegra F, et al. (2023) Microfracture- and Xeno-Matrix-Induced Chondrogenesis for Treatment of Focal Traumatic Cartilage Defects of the Knee: Age-Based Mid-Term Results. *Healthcare.* 2023;11(22):2995. <https://doi.org/10.3390/healthcare11222995>
33. Sciarretta F, (2023) One-stage cartilage repair using the autologous matrix-induced chondrogenesis combined with simultaneous use of autologous adipose tissue graft and adipose tissue mesenchymal cells technique: clinical results and magnetic resonance imaging evaluation at five-year follow-up. *Int Orthop.* 2023;1–11. <https://doi.org/10.1007/s00264-023-05921-8>
